April 22, 2010

Dear Parents of Ross High School Students,

As you may be aware, the new middle school will be located next to Fremont Ross High School on North Street. The construction project will begin during the first week in May. The construction vehicles will be utilizing the Bypass (State Routes 53/6/20), Oak Harbor Road and Cedar Street. High school students driving to The Tech Center and Vanguard should pay extra attention on these roads. If you have any concerns, please contact Michael Huddleston, Telamon Construction Project Manager, at 419-680-1361.

Additionally, students attending The Tech Center or Vanguard will need to use the sidewalk that leads from the high school to the Tech Center only. Ross students attending Vanguard will need to walk to The Tech Center and then walk in front of that building to the Vanguard parking lot. This summer Vanguard plans to install a temporary pathway for Vanguard student utilization.

Lastly, all FMS project workers must pass FBI/BCI background checks and participate in the Drug-Free Workplace Program in order to work on the Fremont Middle School site. Because they are working on district property, workers must also abide by our smoke-free policies as well. Please contact me if you have any questions. Thank you.

Sincerely,

*Traci McCaudy*
